

I travel to and from Los Angeles at least five times a month. When I travel, I listen to XM traffic and weather to plan ahead accordingly. By limiting or eliminating this ESSENTIAL information, you infringe upon my rights as a citizen to be informed. I can not stress to you how important this service is to me as a PAYING CUSTOMER. Granted, if this were a free service, which it is not, you might have the right to curtail or eliminate it, however, it appears that the free radio lobbyists are attempting to influence your decision. If the decision is made to eliminate this service, I will not support, and will encourage friends, family, neighbors and businessmen, to do all that is possible to bring change to the FCC. OPPOSE HR 4026!
